

The best defense against breast cancer is early detection:

- Have an annual breast exam by your physician
- Practice monthly breast self-exams
- Have a baseline mammogram at age 40, and routine screenings thereafter
- Recognize the importance of additional types of breast exams such as ultrasound and MRI
- Be aware of your personal risk for breast cancer

Bone Density Studies (DEXA Scans).

Women should accept no less than a caring, comfortable and compassionate team of specialists dedicated to breast imaging.

Trust Mount Sinai South Nassau Center for Women's Imaging to deliver your results with professional accuracy in a manner that respects your personal concerns.

To schedule an appointment, please call:

516-255-8220

440 Merrick Road in Oceanside, NY

T: 516-255-8220 / F: 516-255-8219

Our only location
